Student Growth & Assessment Data

Important Requirements and Reminders

This handout was created to help explain Michigan's Student Growth and Assessment Data requirements for educator evaluations, as defined in state statute. The pie charts below depict the percentage of areas that must be used. Student growth for administrators must be measured using the aggregate of student growth data used for the teachers in their building, or for the district in the case of central office administrators.

NON-STATE STUDENT GROWTH MEASURES

Until 2018-19, 25% of educator evaluations are required to be based upon student growth – no more, no less – and do not have to but may incorporate state assessment data. Here are a few examples of non-state student growth measures you can utilize:[1]

- Nationally normed or locally developed assessments aligned to state standards
- Research-based growth measures or alternative assessments that are rigorous and comparable across the district
- Individualized education program (IEP) goals (as applicable)

Be Ready. Plan Ahead.

With 25% of educator evaluations currently based on student growth and the shift to 40% in 2018-19 and beyond, it's wise to plan ahead...

Ask yourself the following questions regarding your school/district:

- **Have you established clear approaches to measuring student growth and provided teachers and school administrators with relevant data on student growth?**
  Districts must inform teachers of which growth measures may be used by grade/subject (must include two or more per teacher).
- **Are your growth measures rigorous and comparable across like schools within the district?**
  Think about whether you have multiple buildings at the same level.
- **Do you have a system to collect and aggregate three years of student growth and assessment data by teacher?**
  Data must come from a three-consecutive-school-year-period, or whatever is available, but does not have to be from the same growth measure. *(e.g. STAR reading and math in year 1 & 2; NWEA reading and math in year 3)*
- **Do you have a system to collect and aggregate teachers' student growth and assessment data for administrators?**
  Admin's student growth rating is based on an aggregate of the teacher data, NOT the teachers' evaluation ratings or aggregate of other measures.

A-F LETTER GRADES

GRETCHEN WHITMER
GOVERNOR

STATE OF MICHIGAN
DEPARTMENT OF EDUCATION
LANSING

SHEILA A. ALLES
INTERIM STATE SUPERINTENDENT

MEMORANDUM

DATE: January 10, 2019

TO: Local and Intermediate School District Superintendents
Public School Academy Directors

FROM: Venessa A. Keesler

...proposed standards for determining letter grades and ...to a yet-to-be appointed peer review panel.

The MDE has identified a number of areas in the new law that conflict with federal law and Michigan's approved plan to comply with the federal Every Student Succeeds Act (ESSA). Proposed amendments to any state's ESSA plan that has been approved by the U.S. Department of Education require another thorough round of stakeholder feedback, and subsequent approval by the Governor. Michigan's current ESSA accountability system represented more than a year of stakeholder input and engagement and was the result of much discussion and compromise among stakeholders to balance their recommendations and federal ESSA requirements.

Because of the conflicts with federal law and expected timing issues to receive approved amendments to Michigan's ESSA plan, the MDE has reached out to the U.S. Department of Education and the Michigan Attorney General's office for guidance on how best to proceed.
