22

22

MI Data Hub Update

Portable Student Records

The problem we are trying to solve:

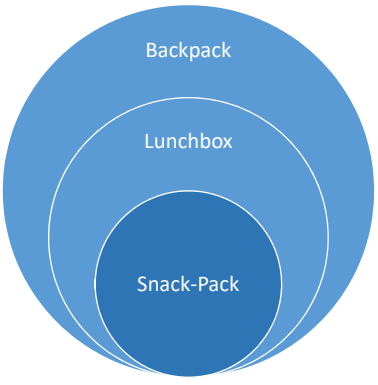

- Districts need to know what services students are eligible for when they enroll.
- This information is not readily available – not timely from the previous district and/or parents do not know.
- MSDS can mitigate this issue to some extent but with notable limitations.
- Bottom line: Students may not get services they're entitled to in a timely manner.

23

23

MI Data Hub Update

Portable Student Records

Snack-Pack: Information districts need to quickly enroll a child in the appropriate combination of services.

MI Data Hub Update

Student Snackpack - Process

- A user searches and receives a UIC in their SIS
- Upon receiving the UIC, user makes a secondary call requesting snackpack data
- The snackpack data is retrieved, routed through the data hubs, back to the SIS
- The SIS displays the data to the user via screen and/or report

26

26

MI Data Hub Update

Future Vision: Based on Data Standards

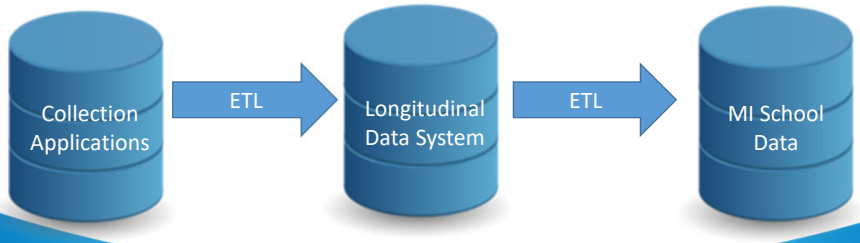

CENTER FOR EDUCATIONAL PERFORMANCE AND INFORMATION

30

30

CEPI Data Flows – Current

- State Data is stored in at least 3 formats and locations.
- Duplication of effort and storage across systems
- Lack of data standards
- Data Quality issues due to multiple data moves
- Requires many validation processes

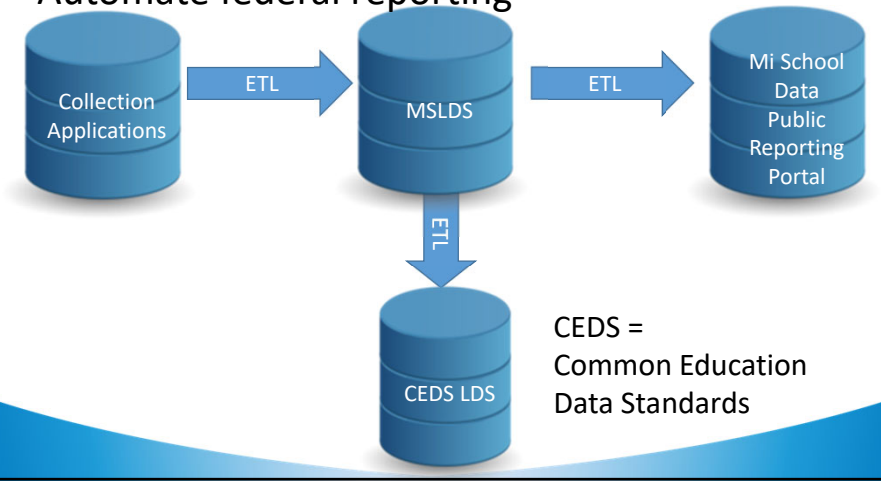

31

31

CEPI Data Flows – Future

- Developing a single source for data communications based on national standards
- Automate federal reporting

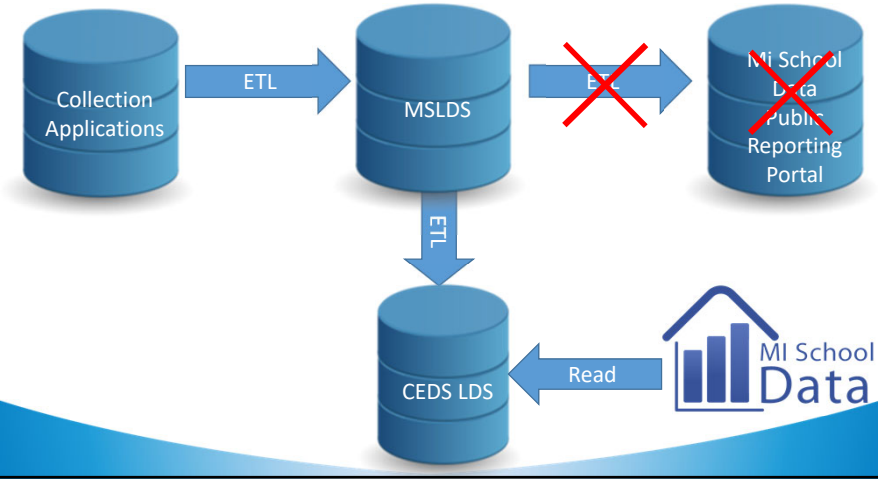

32

32

CEPI Data Flows – Future

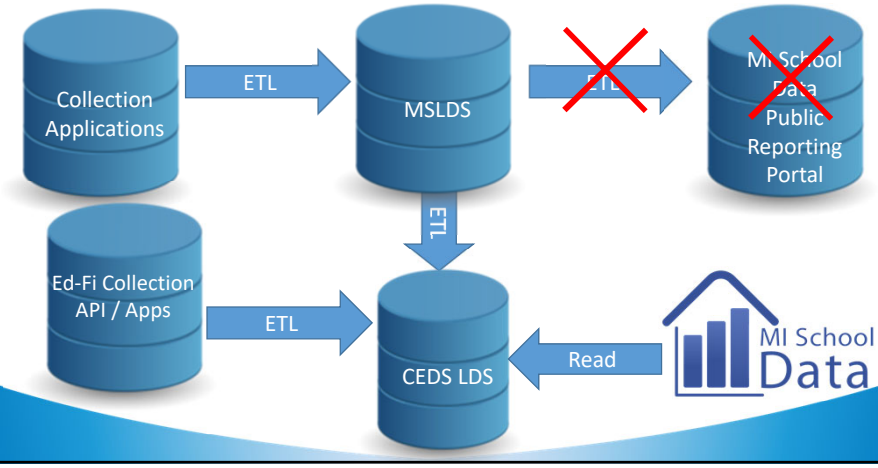

- MI School Data redesigned
- No longer a separate data source

33

CEPI Data Flows – Future

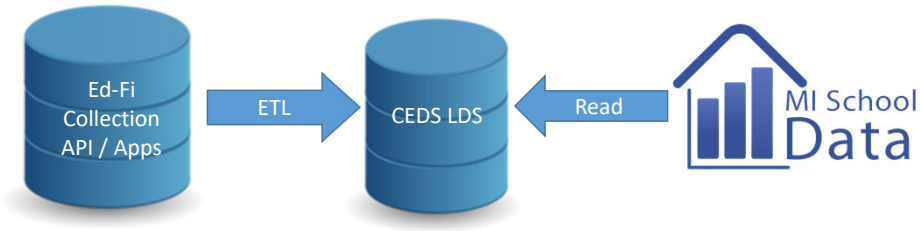

- Data collected directly from data hubs
- CEDS standard definitions
- Ed-Fi based web services

34

CEPI Data Flows – Future
