OUR SERVICE

MPAAA is the premiere training organization for Pupil Accounting and Attendance issues in the state of Michigan. It is our vision that Michigan's educational community is well trained, informed, and prepared for the challenge of an ever changing, data driven educational and regulatory environment.

DATA QUALITY 1

DATA QUALITY AT THE INPUT LEVEL

Are you a school secretary, registrar, or another staff member who inputs student data? If so, then this 3-hour data quality session is for you! Designed for those doing student data entry, this session will cover:

- What the data is used for, and why it matters to get it right!
- The benefits of high-quality data and the costs of low-quality data.
- Techniques to make your job as easy as possible to get the data right.
- Data Privacy requirements and what you need to know to protect your student's privacy.

This newly designed session will be presented by Rob Dickinson, the Executive Director of the Michigan Pupil Accounting and Attendance Association (MPAAA). Rob's 25 years in student data and pupil accounting have given him a keen sense of the challenges that school secretaries and registrars face in their jobs. The tips and tricks he will share with you will help you get through the data-entry part of your job quickly and easily, so you can change hats, and get on with the rest of the day!
